

PACKAGING

1 Option of sending the box back

The box can be filled with used batteries and packaging from the electrical components that the desk contains. These can be very harmful for the environment, if not disposed of correctly. Collected equipment can later be sorted and transported to appropriate services by our company.

2 Giving the packaging a new life

We provide different alternate functions for the packaging; boxes to store pens in, cardboard drawer organizers, laptop holders ...

Our wooden boxes don't come with a top layer, partly to limit the weight of our desk. If the user wants to cover the inside of the boxes, he can use a part of the packaging.
